### **DETAILED ACTION**

1. Claims 1-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected retracting apparatus, there being no allowable generic or linking claim. Applicant timely did not traverse the restriction (election) requirement in the reply filed on November 3, 2005; so therefore, the election is treated as an election without traverse.

The requirement is still deemed proper and is therefore made FINAL.

This application is in condition for allowance except for the presence of claims 1-7 to an invention non-elected without traverse in the reply filed on November 3, 2005. Therefore, the Examiner has canceled claims 1-7.

### *Reasons for Allowance*

3. The following is an examiner's statement of reasons for allowance: the prior art or record fails to show or fairly suggest the combination as claimed including a large diameter portion at one end of the guiding groove wherein the sliding pin, provided within the sliding member, rotates in an orthogonal direction and locks the sliding member. Once the sliding pin locks, the engagement between the sliding member and the driving member is cancelled. The device as claimed is non-equivalent and substantially different from the prior art of record.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
